SUMMARY

Computer Science and Engineering student with hands-on experience in Python, Machine Learning, Flask, and Web Development. Developed AI-powered and full-stack applications through academic projects and internships. Eager to apply technical skills and problem-solving abilities in software development roles.

TECHNICAL SKILLS

Programming Languages: C, Python, Java

Web Technologies: HTML, CSS, JavaScript, Flask, Streamlit

Machine Learning & Data: Data Preprocessing, Model Training, Deep Learning, NLP, Exploratory Data Analysis (EDA)

Tools: Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Data Analytics Intern

Jul 2025 – Aug 2025

Crescent Infotech • Onsite

- Performed data collection, cleaning, and exploratory data analysis (EDA) on structured datasets.
- Worked on a cloud storage security project focused on data integrity and storage verification.
- Applied data analysis techniques to identify patterns and improve data reliability.

Full Stack Development Intern

Dec 2025 – Jan 2026

BucketStudy • Remote

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Assisted in backend development and database integration.
- Tested and debugged applications to improve performance.

PROJECT EXPERIENCE

Lookify – AI-Based Image Recognition Web Application

Python, Flask, EfficientNetB0, Deep Learning

- Developed an AI-based image recognition web application using Flask and EfficientNetB0.
- Enabled object classification through image upload and live camera input.
- Deployed the model through a lightweight Flask backend.

ThinkSpark – Brain Testing Web Game

HTML, CSS, JavaScript, Python, Flask, SQLite, JSON, Render

- Developed an interactive brain-testing web game with memory, focus, and reasoning challenges.
- Built responsive front-end gameplay features using HTML, CSS, and JavaScript.
- Integrated Flask and SQLite for user data management and game progress tracking.
- Deployed the application on Render for online access.

Fake News Detector – Machine Learning-Based Detection System

Python, NLP, TF-IDF, Naive Bayes, Streamlit

- Developed a machine learning application to classify news articles as Real or Fake.
- Implemented TF-IDF vectorization and a Naive Bayes classifier for text analysis.
- Built an interactive Streamlit interface with real-time predictions and confidence scores.

ACHIEVEMENTS & CERTIFICATIONS

- NPTEL Elite + Silver Certification in Cloud Computing — scored 76% in Performance Matrix.
- CS50x: Introduction to Computer Science — accredited by Harvard University.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Graduation Expected: 2027

Gnanamani College of Technology, Namakkal, India • CGPA: 8.09
